

Life's journey is NOT to arrive at the grave safely in a well preserved body but rather to skid in sideways, totally worn out, shouting "HOLY COW ...WHAT A RIDE!"

You sit behind the handlebars, while the engine plays its tune, you ride by soul, more than touch, as if guided by some ancient rune.

Motorcycling has got to be one of the most exhilarating ways to travel.

Those responsible for shaping our world seem to believe that we all want to live our lives in a cotton-wool-lined world. This assumption has led us into a lifestyle that is less involving, less demanding, highly predictable and simply DULL. Motorcycling turns all of this on its head! It makes us feel glad to be alive; it is invigorating and helps us connect with this spectacular world around us. This is a major factor when we try to understand why motorcycling is just so popular.

The days of women riding around on 50cc mopeds are over. According to a survey by a bike insurance firm, almost a quarter of female riders own a 600cc bike or above. More than 50% of female motorcyclists ride purely for pleasure.

Riding a motorcycle is all about control; a motorcycle becomes an extension of your body. Every twist and turn along the way is down to you, -the rider. With control comes responsibility and, as a motorcyclist, this responsibility is for both yourself and for those around you.

Riding a motorcycle is something that you are going to want to enjoy doing for many years to come, so you'll have to learn how to control a motorcycle in a skilful and responsible way. Your safety will depend on your ability to control this machine in a way you have never controlled any machine before.

Many people will tell you that it takes years of experience to become a really great rider; in some cases, this is very true but great training will give you a head start. This is where LIBERTY-MCT.CO.UK comes into its own.

Give us a call today.
